MayTech Global Investments, LLC ("MayTech") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared this report in compliance with the GIPS standards. MayTech has been independently verified for the periods January 1, 2017 through December 31, 2020. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Global Growth Composite has had a performance examination for the periods June 1, 2008 through December 31, 2020. The verification and performance examination reports are available upon request. The prior firm also claims compliance with the GIPS and had been independently verified for the time periods 2008-2016.

Notes:

1. MayTech Global Investments, LLC ("MayTech") is a registered investment advisor that provides investment management services. Established in 2017, performance prior to 1/1/17 occurred while the portfolio manager was affiliated with a prior firm. The portfolio manager was the only individual responsible for selecting the securities to buy and sell and MayTech meets the GIPS Portability requirements. The prior firm was GIPS compliant and independently verified. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.
2. The Global Growth Composite includes all institutional and high net worth portfolios that invest in equities and equity related securities. The objective of the Global Growth Equity composite is long term growth specializing in the field of technology. Prior to 1/1/12, the composite was known as the Opportunistic All Cap Growth.
3. Although the strategy allows for equity exposure ranging between 75-100%, the typical allocation is between 90-100%.
4. The benchmark is the MSCI ACWI Total Return Index. The MSCI ACWI Index captures large and mid-cap representation across 23 Developed Markets and 24 Emerging Markets countries. With 2,756 constituents, the index covers approximately 85% of the global investable equity opportunity set. Net total return indexes reinvest dividends after the deduction of withholding taxes, using (for international indexes) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.
5. Valuations are computed and performance is reported in U.S. Dollars.
6. Gross-of-fees returns reflect the reinvestment of dividends and other earnings and are presented before management fees but after all trading expenses.
7. Net-of-fees returns are calculated using actual management fees. The representative management fee schedule is as follows: 1.50% on the first \$2.5 million; 1.40% of the next \$2.5 million; 1.30% of the next \$2.5 million; 1.20% of the next \$2.5 million or, 1.25% of the first \$10 million; and 0.90% thereafter.
8. The composite returns include the performance of non-fee-paying portfolios. The composite contained less than 1% of non-fee paying assets at the end of years 2015, 2016, 2017, 2018, and 2019.
9. This composite was created 06/01/2008. A complete list of composite descriptions is available upon request.
10. Internal dispersion is calculated using the equal-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. Where 5 or fewer portfolios were present for the entire year, the dispersion calculation is not significant and is marked as N/A.
11. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period. The standard deviation is not presented for 2009 through 2011 because monthly composite and benchmark returns were not available, and is not required for periods prior to 2011.
