MayTech Global Investments, LLC ("MayTech") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared this report in compliance with the GIPS standards. MayTech has been independently verified for the periods January 1, 2017 through December 31, 2025. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. The Global Growth Composite has had a performance examination for the periods January 1, 2017 through December 31, 2025. The verification and performance examination reports are available upon request.

Notes:

1. MayTech Global Investments, LLC ("MayTech") is a registered investment advisor that provides investment management services. The Global Growth Composite includes all institutional and high net worth portfolios that invest in equities and equity related securities. The objective of the Global Growth Equity composite is long term growth specializing in the field of technology.
2. Although the strategy allows for equity exposure ranging between 75-100%, the typical allocation is between 90-100%.
3. The benchmark is the MSCI ACWI Total Return Index. The MSCI ACWI Index captures large and mid-cap representation across 23 Developed Markets and 24 Emerging Markets countries. With 2,558 constituents, the index covers approximately 85% of the global investable equity opportunity set. Net total return indexes reinvest dividends after the deduction of withholding taxes, using (for international indexes) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. Indexes are unmanaged, do not incur management fees, costs, and expenses, and cannot be invested in directly.
4. Valuations are computed and performance is reported in U.S. Dollars.
5. Gross-of-fees returns reflect the reinvestment of dividends and other earnings and are presented before management fees but after all trading expenses.
6. Net-of-fees returns are calculated using actual management fees. Non-fee accounts are generally excluded unless they qualify for inclusion and have materially lower performance than the rest of the composite portfolios. Non-fee accounts included in the composite assume the highest fee MayTech charges, which is 1.5%. The representative management fee schedule is as follows: 1.50% on the first $2.5 million; 1.40% of the next $2.5million; 1.30% of the next $2.5 million; 1.20% of the next $2.5 million or, 1.25% of the first $10 million; and 0.90% thereafter.
7. This composite was created 1/1/2017. A complete list of composite descriptions is available upon request.
8. Internal dispersion is calculated using the equal-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. Where 5 or fewer portfolios were present for the entire year, the dispersion calculation is not significant and is marked as N/A.
9. The three-year annualized standard deviation measures the variability of the composite and the benchmark returns over the preceding 36-month period.
