FOR IMMEDIATE RELEASE

MayTech Global Growth ETF Launches
NASDAQ Ticker: MTGG

New York, NY – October 27, 2026 – MayTech Global Investments LLC announced the launch of the MayTech Global Growth ETF (ticker: MTGG), now trading on NASDAQ.

MTGG offers investors a focused investment in high-quality growth companies that MayTech believes are benefiting from innovation and structural change.

> *"MTGG gives investors our high-conviction ideas from around the world with the trading flexibility and convenience of an ETF," said Nels Wangensteen, Co-Founder and CEO of MayTech Global Investments LLC.*

Why Investors Consider MTGG

- **Exposure to Advances in Information Technology:** Positioned to benefit from companies driving artificial intelligence, automation, and digital infrastructure innovation.
- **Exposure to Advances in Health Science:** Access to companies innovating across biotechnology, medical technology, and healthcare delivery.
- **Exposure to Changes in Globalization:** Positioned to benefit from evolving global trade, supply chains, and cross-border economic activities.

> *"We want to own companies that are accumulating structural power as AI diffuses across the economy," added Dr. Ingrid Yin, Co-Founder and CIO at MayTech Global Investments LLC.*

Investors can buy MTGG through their broker or financial advisor. Learn more at **www.maytechETF.com**.

IMPORTANT DISCLOSURES

Investors should consider the investment objectives, risks, charges and expenses carefully before investing. For a prospectus or summary prospectus with this and other information about the Fund, please call 877-977-9971. Read the prospectus or summary prospectus carefully before investing.

Investing involves risk. Principal loss is possible.

Technology Sector Risk. The Fund will invest substantially in companies in the information technology sector, and therefore the performance of the Fund could be negatively impacted by events affecting this sector. Market or economic factors impacting technology companies and companies that rely heavily on technological advances could have a significant effect on the value of the Fund's investments.

Growth Stock Investment Risk. Growth-oriented common stocks may involve larger pricing swings and greater potential for loss than other types of investments.

Foreign Securities Risk. Investments in non-U.S. securities involve risks that may not be present with investments in U.S. securities. For example, investments in non-U.S. securities may be subject to risk of loss due to foreign currency fluctuations or to political or economic instability.

New Fund Risk. The Fund is a recently organized management investment company with no operating history. As a result, prospective investors do not have a track record or history on which to base their investment decisions.

Non-Diversification Risk. Because the Fund is "non-diversified," it may invest a greater percentage of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund.
