Investment Style

Our worldview drives the investment process. This “big picture” approach seeks to identify companies with a strong competitive position and defendable economic moats, which are best positioned for potential future success.

Four current key global forces that stimulate innovation

- Accelerating advances in technology
- Emerging consumers
- Demographic shifts
- Regulatory changes

Core belief & observations

- The global economy has become “winner takes all”
- The pace of change is accelerating ... and investors have not recognized it
- Innovative ideas are replacing capital and labor as the most important factors in production

** Performance prior to 1/1/17 occurred while the portfolio manager implemented a substantially similar strategy while affiliated with a prior firm. For further information on Investment Process, Indices, Holdings please see Important Disclosures on page 4.

Past performance may not be indicative of future returns. The value of any investment may rise or fall over time. Principal is not guaranteed, and investors may receive less than the full amount of principal invested at the time of redemption if asset values have declined. Individual account performance may be greater than or less than the performance presented for this composite.

MayTech Global Investments, LLC ("MayTech") claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared this report in compliance with the GIPS standards. MayTech has been independently verified for the periods January 1, 2017 through December 31, 2017. The prior firm also claims compliance with the GIPS and had been independently verified for the time periods 2008-2016. The verification report is available upon request. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. Verification does not ensure the accuracy of any specific composite presentation.

Notes:

- 1. MayTech Global Investments, LLC** ("MayTech") is a registered investment advisor that provides investment management services. Established in 2017, performance prior to 1/1/17 occurred while the portfolio manager was affiliated with a prior firm. The portfolio manager was the only individual responsible for selecting the securities to buy and sell and Maytech meets the GIPS Portability requirements. The prior firm was GIPS compliant and independently verified. Policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request.
- 2. The Global Growth Composite** includes all institutional and high net worth portfolios that invest in equities and equity related securities. The objective of the Global Growth Equity composite is long term growth specializing in the field of technology. Prior to 1/1/12, the composite was known as the Opportunistic All Cap Growth.
- 3. Although the strategy** allows for equity exposure ranging between 75-100%, the typical allocation is between 90-100%.
- 4. The benchmark** is the MSCI ACWI Total Return Index. The MSCI ACWI Index captures large and mid-cap representation across 23 Developed Markets and 23 Emerging Markets countries. With 2,484 constituents, the index covers approximately 85% of the global investable equity opportunity set. Net total return indexes reinvest dividends after the deduction of withholding taxes, using (for international indexes) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.
- 5. Valuations** are computed and performance is reported in U.S. Dollars.
- 6. Gross-of-fees** returns reflect the reinvestment of dividends and other earnings and are presented before management fees but after all trading expenses.
- 7. Net-of-fees** returns are calculated using actual management fees. The representative management fee schedule is as follows: 1.50% on the first \$2.5 million; 1.40% of the next \$2.5million; 1.30% of the next \$2.5 million; 1.20% of the next \$2,499,999 or, 1.25% of the first \$10 million; and 0.90% thereafter.
- 8. The composite returns** include the performance of non-fee-paying portfolios. The percentage of non-fee-paying portfolios represented 0.59% of the composite as of 12/31/16 and 0.52% as of 12/31/15.
- 9. This composite** was created 06/01/2008. A complete list of composite descriptions is available upon request.
- 10. Internal dispersion** is calculated using the equal-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. Where 5 or fewer portfolios were present for the entire year, the dispersion calculation is not significant and is marked as N/A.
- 11. The three-year annualized standard deviation** measures the variability of the composite and the benchmark returns over the preceding 36-month period. The standard deviation is not presented for 2009 through 2011 because monthly composite and benchmark returns were not available, and is not required for periods prior to 2011.
